*Within the frame of TC project RER-8-009 "Air Pollution Monitoring in the Mediterranean Region"*

**Organized by the International Atomic Energy Agency in Cooperation with  
Radiological and Environmental Sciences Laboratory  
Department of Energy, United States of America**

April 2006 - November 2006

This test was organized by the IAEA, in accordance with the guidelines of the ISO/IUPAC International Harmonized Protocol for Proficiency Testing of the (Chemical) Analytical Laboratories, © IUPAC, 1993.

Each participant received a detailed report on his/her performance. This report included an evaluation of the trueness and precision of the reported data and where possible, suggestions or reasons to explain any large discrepancies. A final report (IAEA/AL/169) containing an evaluation of all participants was issued by the IAEA Reference Materials Group. In this latter report, all laboratories have been assigned a code to ensure anonymity and therefore identification of a particular laboratory's results can only be obtained with the agreement of that laboratory.
